

Property Buying & Rental System using Zoho

Aim

To create a simple **Property Buying & Rental System using Zoho One** as a cloud-based SaaS application.

Steps / Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from Zoho One.
3. Create a new application for property buying and rental.
4. Create a form named **Property Buying & Rental**.
5. Add the required fields:
 - Property Type
 - Property Category
 - Rental Agreement
 - Area
 - Place
 - Range
 - Property Value
6. Select the suitable field type for each field.
7. Arrange the fields properly in the form.
8. Save and publish the form.
9. Enter sample property details.
10. Submit the form.
11. Check whether the property details are stored in the cloud.
12. Test the form with different property details.

Implementation

Input:

The screenshot shows a web application interface for a property buying and rental system. On the left is a dark sidebar with a logo 'PBA' and the title 'property buying and rental process'. Below the title are three menu items: 'Property Buying & Rental system' (selected), 'Property Buying & Rental system', and 'Property Buying & Rental system Report'. At the bottom of the sidebar is a user profile for 'Niharika Rajk...'. The main content area is titled 'Property Buying & Rental system' and contains a form with the following fields: 'property type' with radio buttons for 'buy' and 'rent' (selected); 'property category' with radio buttons for 'commercial' and 'residential' (selected); 'rental agreement' with radio buttons for 'required' and 'not required' (selected); 'area' with a dropdown menu showing '-Select-'; 'place' with a dropdown menu showing '-Select-'; 'range' with a dropdown menu showing '-Select-'; and 'property value' with a text input field containing '#####'. A blue 'Submit' button is located at the bottom of the form.

Output:

The screenshot shows a report titled 'Property Buying & Rental system Report'. It features a table with columns for 'property type', 'property category', and 'rental agreement'. The table contains three rows of data. A modal window is open on the right, displaying a detailed view of the selected row (rent, residential, not required). The modal includes fields for 'property type', 'property category', 'rental agreement', 'range', 'place', 'area', and 'property value'. Below the modal is a link to 'Add a comment'.

property type	property category	rental agreement
rent	commercial	
rent	residential	not required
buy	commercial	required

property type	rent
property category	residential
rental agreement	not required
range	20-50k
place	anna nagar
area	1000 sq.ft
property value	7578964

Result

Thus, the **Property Buying & Rental System** was successfully created using **Zoho One** and works as a **SaaS application**.
