Student Information System

Aim

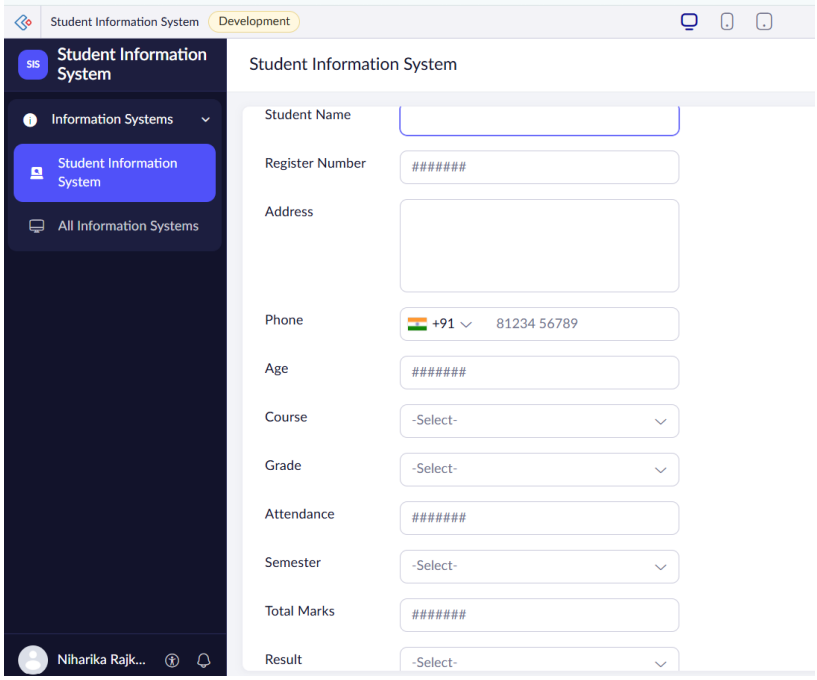

To create a simple Student Information System using Zoho One as a cloud-based SaaS application to display student details, courses, grades, attendance, progress reports, and semester mark sheets.

Steps / Procedure

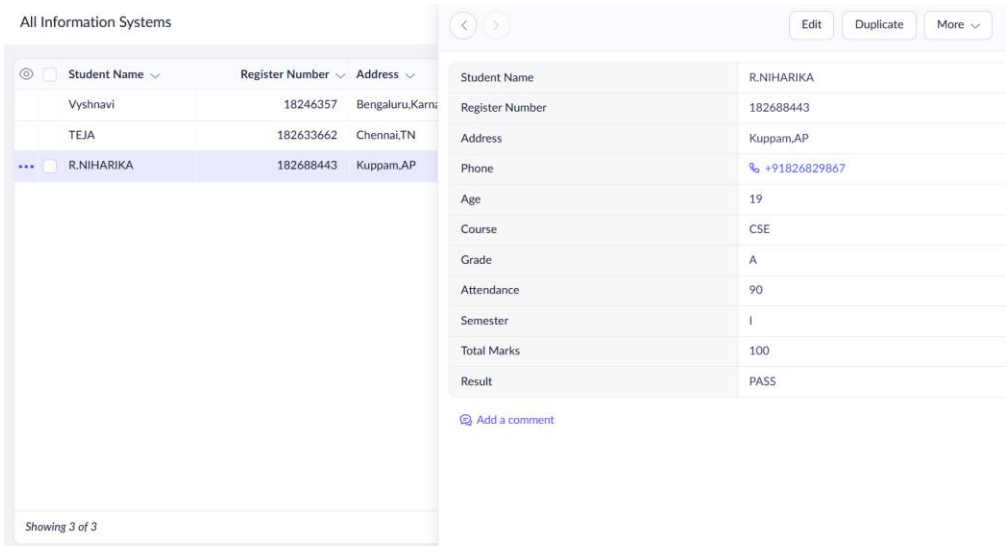

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from Zoho One.
3. Create a new application named Student Information System.
4. Create a form named Student Information.
5. Add the required fields with suitable field types.
6. Create separate forms for Attendance Report, Progress Report, and Semester Mark Sheet.
7. Arrange the fields properly in each form.
8. Save and publish the forms.
9. Enter sample student information.
10. Submit the forms.
11. Check whether the student details are stored in the cloud.
12. Test the application with different student details.

Implementation

Input:

Output:

Result

Thus, the Student Information System was successfully created using Zoho One and works as a cloud-based SaaS application to store and display student information and academic records.
