EXPERIMENT 12 – Demonstration of virtualization

Aim

To demonstrate virtualization by installing a Type-2 hypervisor and creating and configuring a virtual machine with a Windows or Linux operating system.

Requirements

1. Computer or laptop with Windows/Linux.
2. Oracle VirtualBox or VMware Workstation.
3. Windows/Linux ISO image.
4. Minimum 8 GB RAM recommended.
5. Sufficient free disk space.

Procedure

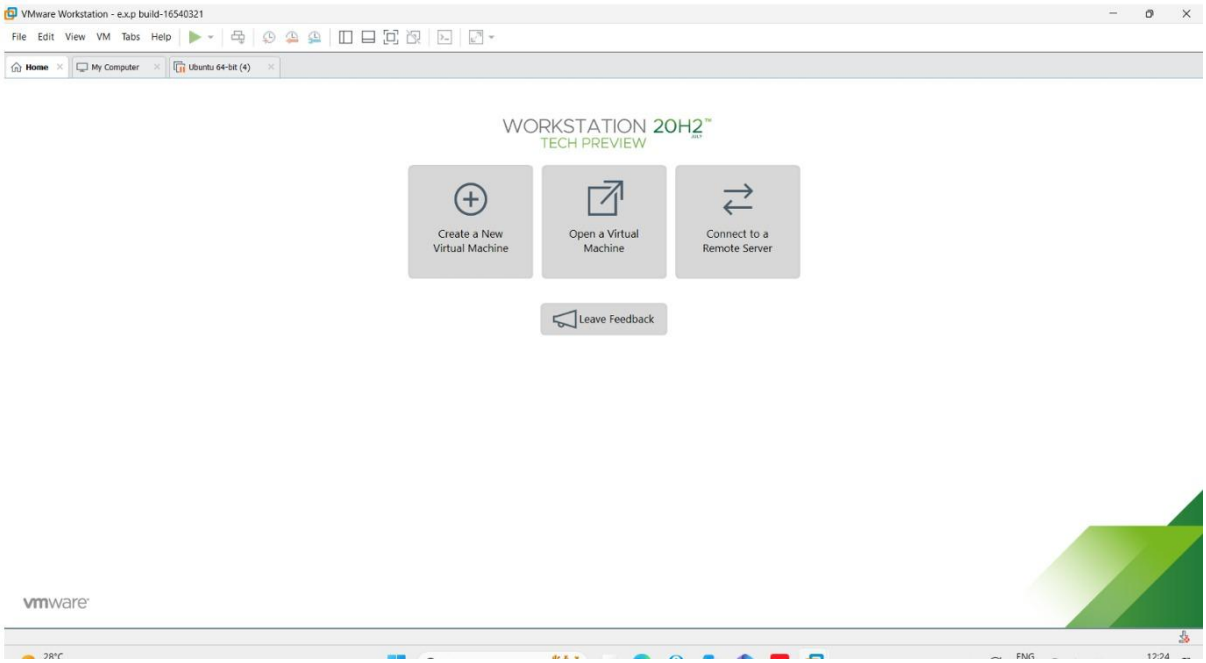

1. Download and install Oracle VirtualBox.
2. Download a Windows or Linux ISO image.
3. Open VirtualBox and click **New**.
4. Enter the virtual machine name and select the operating system.
5. Allocate RAM and create a virtual hard disk.
6. Select the downloaded ISO image.
7. Start the virtual machine and install the operating system.
8. Configure the VM settings and restart the virtual machine.
9. Verify that the operating system runs successfully.

Implementation

Input:

VMware Workstation application opened on the Windows host computer.

Output:

Result

Virtualization was successfully demonstrated by installing a Type-2 hypervisor and creating and configuring a virtual machine with Ubuntu Linux.
